## PROJECTS

### Castle Cars Edinburgh

<https://castlecarsedinburgh.co.uk>

A taxi-booking and fleet-management platform for a UK-based private-hire company. I have built the full backend and frontend, integrated payments, driver dispatch, and automated emails — deployed and running in production on a VPS.

Dec 2025 - Apr 2026 | Edinburgh UK

#### Key Highlights

- Integrated Stripe for online payments, including webhook handling for booking confirmations
- Added role-based auth for admin, moderators and customers using Better Auth
- Deployed the full app on a VPS and it's currently live in production

#### Contact Person

Anika Ehtisham | [anikaehtisham123@gmail.com](mailto:anikaehtisham123@gmail.com)

### Flottehelfer

<https://play.google.com/store/apps/details?id=com.flottehelfer.app>

A service management mobile app for cleaning/maintenance businesses. Employees manage bookings, capture signatures, upload job photos and track visits on the go, built in Expo - React Native with a Node.js/Express backend, deployed on a VPS and live on both the Play Store and App Store.

Nov 2024 - Feb 2025 | Berlin Germany

#### Key Highlights

- Built the full mobile app in Expo - React Native and the backend API in Node.js, Express and MongoDB
- Built auth from scratch with JWT, bcrypt, and role-based access for admin, employee.
- Set up email notifications via Nodemailer for booking events and password resets
- Deployed backend on a VPS and published the app to both Google Play Store and Apple App Store live in production
